Unit (1): Lesson (1)

Divisibility

Complete:

1) The largest 3-digit number divisible by 2, 5 and 10 is ....990.....
2) If 5 X 4 = 20, then 20 is a ....multiple.... of 5 and 4.
3) If 6 X 8 = 48, then 6 and 8 are .....Factors.... of 48.
4) If 32 is a multiple of 8, then 32 is ....divisible.... by 8.
5) The smallest 3-digit number divisible by 2, 4 and 10 is .....100.....
6) If 54 is divisible by 6, then 6 is called a .....Factor..... of 54.
7) For any number to be divisible by 6, it must be divisible by ....3.... and ....2....
8) For any number to be divisible by 10, it must be divisible by ....2.... and ....5....
9) 8 is a .....Factor..... of 72.
10) For any number to be divisible by 10, its ones digit must be .....0.....
11) 35 is ....divisible.... by 7.
12) 4 is a ....multiple.... of 2.
13) 3 is a .....Factor..... of 27.
14) If 5 X 6 = 30, then 30 is a ....multiple.... of 6 and 5 is .....Factor..... of 30.
15) ~~From~~ the multiples of 8 .....16..... and .....32.....
16) ~~From~~ the factors of 12 .....24..... and .....36.....
17) 24 is divisible by .....2..... and .....6.....

Answer the following:

1) **A school took 228 students in a trip. Can we distribute them equally among 4 buses? Why?**

yes, because 28 is divisible by 4. 228 ÷ 4 = 57

2) **The food bank wants to distribute 567 boxes. It is possible to distribute the boxes among 6 villages equally ?**

No, because 567 should be divisible by 2 and 3 to be divisible by 6.

3) **Sara has 105 toys, can she divide them among 10 of her friends? Why or why not ?**

No, because 105 is not divisible by tens, ones place should be zero

4) **Mom bought 18 pencils, and she wants to divide them among her 3 sons. Can she ? Why?**

yes, because the sum of 1+8 is 9 and 9 is in table 3.

Unit (1): Lesson (2)

Factorizing a Number to its Prime Factors

Answer the following:

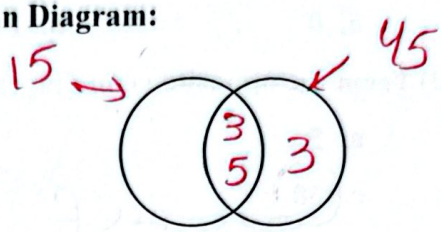

1) Find the GCF and LCM of 15 and 45 using Venn Diagram:

a. **15 =** 3 X 5

b. **45 =** 3 X 5 X 3

c. ***GCF*** **=** 5 X 3 = 15

d. ***LCM*** **=** 3 X 5 X 3 = 45

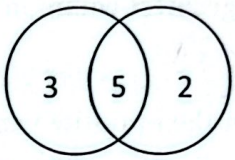

2) Find the GCF and LCM of 15 and 45 using Venn Diagram:

a. **The two numbers represented in the venn diagram are** 15 **and** 10

b. **The *GCF* for the two numbers are** 5

c. **The *LCM* for the two numbers are** 3 X 5 X 2 = 30

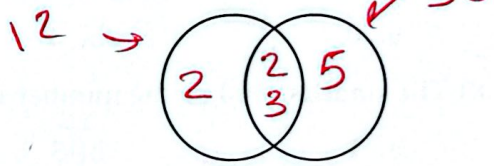

3) Find the GCF and LCM of 12 and 30 using Venn Diagram

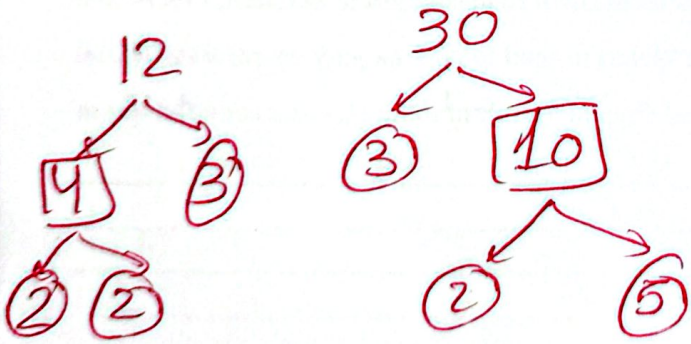

a. **12 =** 2 X 2 X 3

b. **30 =** 2 X 3 X 5

c. ***GCF*** **=** 2 X 3 = 6

d. ***LCM*** **=** 2 X 2 X 3 X 5 = 60

12 = 2 X 2 X 3

30 = 2 X 3 X 5

GCF = 2 X 3 = 6

LCM = 2 X 2 X 3 X 5

= 4 X 15

= 60

Complete:

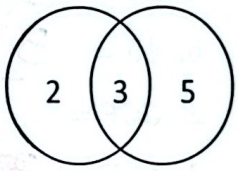

1) The common factor of all numbers is .....

a. 0 b. 1 c. 2 d. 3

2) The lowest common multiple of any two prime numbers is .....

a. 0 b. 1 c. 2 d. 3

3) From the opposite venn diagram, the LCM is .....

a. 5 b. 3

c. 30 d. 2

4) The greatest common factor of 4 and 20 is .....

a. 1 b. 2 c. 4 d. 20

5) The greatest common factor of 5 and 7 is .....

a. 1 b. 2 c. 3 d. 6

6) From the opposite venn diagram, the GCF is .....

a. 2 b. 21 c. 14 d. 7

7) The only even prime number is .....

a. 0 b. 4 c. 2 d. 3

8) The smallest odd prime number is .....

a. 1 b. 3 c. 0 d. 2

9) ..... is neither prime nor a composite number.

a. 1 b. 3 c. 2 d. 0

10) The LCM of 3 and 6 is .....

a. 6 b. 3 c. 1 d. 18

Unit (1): Lesson (3)

Writing Expressions Using the G.C.F

Complete:

1) $15 + 5 = 5\,(3 + 1)$

2) $3 \times (5 + 3) = (15 + 9)$

3) $21 + 28 = 7 \times (3 + 4)$

4) $2 \times (8 + 9) = 2 \times 8 + 2 \times 9$

5) $4(6 + 5) = 4 \times 6 + 4 \times 5$

6) $40 + 60 = 10\,(4 + 6)$ or $20(2 + 3)$

7) $7 \times (8 + 1) = (7 \times 8) + (7 \times 1)$

Use the distributive property and GCF to write the expression of the following addition Problems:

1) 25 + 35

$25 = 5 \times 5$

$35 = 5 \times 7$

GCF = 5 expression = $5(5 + 7)$

25 35

5 5 5 7

2) Mariam prepared bags containing snacks of 12 bananas and 18 cupcakes, she wants the snacks in the bags to be distributed evenly without any food left. What is the greatest number (GCF) of bags of snacks can she prepare? How many bananas and cupcakes are there in each bag ?

12 18

3 4 2 9

2 2 3 3

$12 = 3 \times 2 \times 2$

$18 = 3 \times 2 \times 3$

$GCF = 3 \times 2 = 6$

expression = $6(2 + 3)$
